Please accept this as my submission; I will say I found the links very difficult to navigate and the whole process not very user friendly . I spent ages scrolling just to look for a map showing all outline sites for housing and still didn't find one I am supportive in principle particularly as there is no expectation to build on Chobham Common and the area surrounding Fair Oaks Airport General comments - fine to have housing targets of 10% affordable rented although that seems very low . But serious question , given the national problem of RSL able to provide rented affordable , how operationally do you propose to ensure this is actually delivered? Also it would be far better to aim for the higher standard M4(3)(2)(b) than adaptable which in practice in my experience is literally pointless I wish you luck with this Karen Sinclair-Williams
